

BALA KUBERAN K S

PROFILE

Final year Computer Science Engineering student with strong problem-solving skills and hands-on experience in Java, Spring Boot, SQL, and full-stack application development. Passionate about data structures, algorithms, and building scalable software solutions. Enthusiastic about learning new technologies and writing clean, maintainable code.

SKILLS

Programming : Java, C, Python

Core CS : DSA, OOP, DBMS, OS

Database : MySQL, Firebase Firestore

Web : HTML, CSS, JavaScript

Tools : Git, GitHub

CODING PROFILES

• **LeetCode** : 250+ Problems Solved
leetcode.com/u/balakuberan/

• **HackerRank** – Gold Badge (C)
www.hackerrank.com/balakuberan

SOFT SKILLS

- Leadership
- Problem Solving
- Analytical Thinking
- Team Collaboration
- Quick Learner

CERTIFICATIONS

- Oracle Certified OCI Generative AI Professional
- Programming using Java(Infosys)
- Database Management System(Infosys)
- Introduction to LLMs - (Elite + silver)
- Programming in Modern C++
- Getting Started with Competitive Programming
- Hackerrank: C gold badge, Python silver badge

EDUCATION

- **Mepco Schlenk Engineering College, Sivakasi** 2023 – 2027
Bachelor of Engineering, CSE
CGPA : 7.78 / 10
- **Amala Matric Hr Sec School, Madurai** 2017 – 2023
Higher Secondary (HSC) – Computer Science
521/600 | 86.8%

PROJECTS

E – Pay

- Developed a secure peer-to-peer payment system with transaction validation
- Managed transaction data using MySQL
- Tech Stack: Java, MySQL

Where is My Worker

- Built a real-time service provider discovery app with live location tracking
- Implemented Firebase Authentication and Firestore for real-time updates
- Tech Stack: HTML, CSS, JavaScript, Firebase Authentication, Firestore, Google Maps API

Quick Pick

- Developed a web marketplace with responsive UI
- Integrated Firebase for authentication and real-time product listings
- Tech Stack: HTML, CSS, JavaScript, Firebase Authentication, Firestore
- Live Demo: https://bala-ks.github.io/Quick_Pick/loginpage

Pharma tracker pro – Inventory System

- Developing an inventory tracking system with stock monitoring and alerts
- Optimizing backend logic and database queries
- Tech Stack: Java, Spring Boot, MySQL

Detection of AI-Generated Images using CNN with Grad-CAM Explainability

- Designed and developed a CNN-based image classifier with Grad-CAM to enable explainable AI-generated image detection.
- Improved detection reliability by focusing on complex regions, background features, and edge cases, achieving 4% higher accuracy than the base model.

EXPERIENCE

Infosys – Intern

- Developing REST APIs using Spring Boot.
- Designing MySQL database operations.
- Collaborating with a team using Git.
